Subject: RE: IC-127694-1, Incomplete letter for removal of submarine floats

Hello Chris,

The DNR preferred option is for the contractor to float the pontoons off site and dispose of them at an upland location. However, even if the pontoons are floated off site, DNR will need Thompson's Drilling to secure a right-of-entry for salvage.

We are coordinating with EPA regarding potential impacts to the adjacent cleanup action. Do you have any more information from Thompson regarding how they propose to salvage the pontoons?
